

Clatsop County TRANSPORTATION SAFETY ACTION PLAN

About the plan

Clatsop County is creating a Transportation Safety Action Plan (TSAP) to work towards eliminating all fatal and serious injury crashes in the County. Shaped by community input, the plan aims to create a transportation system where everyone can travel safely, whether they drive, walk, roll, bike, or take public transportation. Once implemented, the plan will guide decisions and investments to reduce crashes and eliminate traffic fatalities on all roads across the County.

Our community-based Task Force is developing a vision statement and goals using Clatsop County's unique geography and community needs along with the Safe System Approach as guides. The Safe System Approach focuses on building multiple safety features into roads to better protect drivers, passengers, and pedestrians.

Schedule

May 2025 – June 2025

Plans and Policy Review and Project Framework

July 2025 – September 2025

Transportation System Data Collection and Analysis

August 2025 – November 2025

Public Involvement and Outreach: Round 1

November 2025 – March 2026

Strategize and Project Selection

April 2026 – May 2026

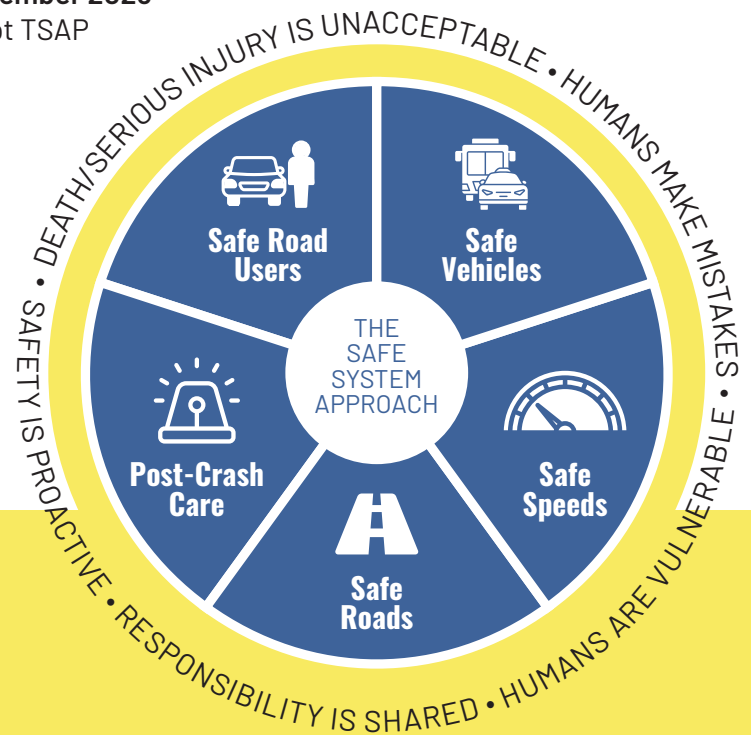

Public Involvement and Outreach: Round 2

May 2026 – August 2026

Draft TSAP

September 2026

Adopt TSAP

**U.S. Department of Transportation
Safe Systems Approach**

Clatsop County TRANSPORTATION SAFETY ACTION PLAN

Share your input and stay informed:

The County is offering opportunities for you to share your ideas about transportation through Spring 2026. We especially want to hear from people who have a higher risk of injury in crashes, like those who walk, bike, and roll.
