

Tangent Transportation System Plan

Help shape how Tangent moves – whether you walk, bike, roll, or drive, **we want to hear from you!**

About the plan

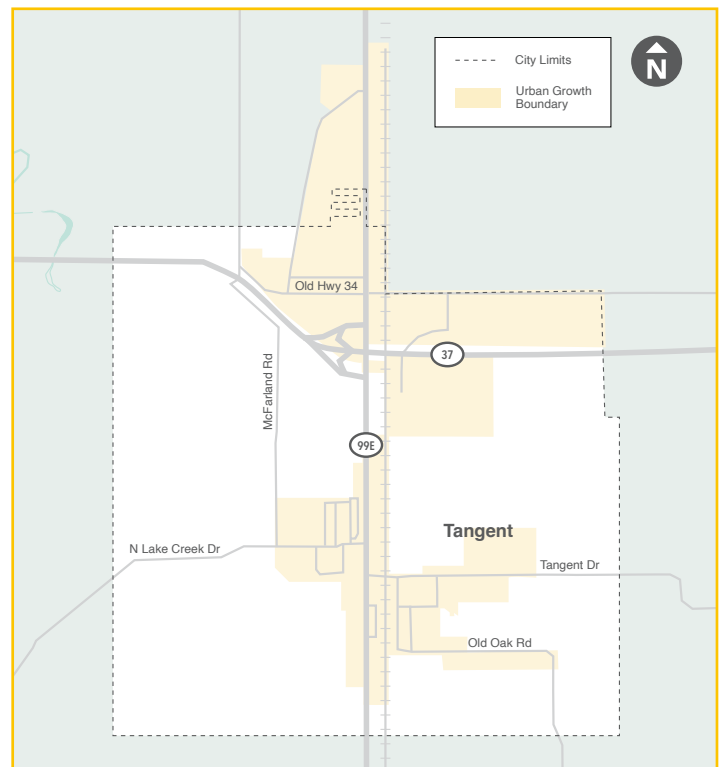

The City of Tangent is updating its Transportation System Plan (TSP). This long-range plan is intended to make getting around Tangent easier and safer. The plan looks at Tangent's roads, bridges, sidewalks and pathways and figures out what is needed now and in the future to make things work better. The TSP will:

- ★ Include the needs and desires of residents and businesses.
- ★ Develop a plan for modern, safe, and comfortable roadways, sidewalks, bikeways and transit facilities that accommodate users of all ages, incomes, and abilities.
- ★ Identify projects to address gaps and improve connections between key destinations such as schools, shopping centers, parks, and employment centers.

Get involved

The City will offer several chances to share your thoughts throughout 2025 while the plan is being developed. Here's how you can participate:

- Fill out a quick survey on our website (closing 7/2/25)
- Leave your comments on our online interactive map (closing 7/2/25)
- Look out for information on our next open house, coming Fall 2025!
