

Boardman Transportation System Plan

About the plan

The City of Boardman completed and adopted a Transportation System Plan (TSP) in 2001. Since the adoption of the 2001 TSP, the City of Boardman has seen significant levels of population growth, new residential and commercial development, and continues to see the adjacent Port of Morrow grow as a major regional employment center. In recognition of this, the City of Boardman is undertaking a major update to its TSP.

To ensure the City has a modern multimodal transportation system for the next 20 years, the TSP will focus on:

- Incorporating the needs and desires of all current and future residents and businesses.
- Developing modern, safe, comfortable, and inclusive multimodal facilities that accommodate users of all ages, incomes, and abilities.
- Identifying projects that will address gaps and improve connections between key destinations such as schools, shopping centers, parks, and employment centers.
- Making walking, rolling, biking, and taking the bus safer and easier.
- Supporting regional transit options.

The City will offer opportunities to provide input on your transportation needs during the plan development in fall 2024 through 2025.

Schedule

Plans and Policy Review and Project Framework

August 2024 – November 2024

Transportation System Inventory and Existing and Future Conditions
