

## ABOUT THE PLANS

Transportation in Umatilla County is about to get safer and more efficient thanks to two new plans: an updated Transportation System Plan (TSP) and a new Safe Streets and Roads for All Plan (SS4A). These plans, shaped by community input, will improve how people get around the county, whether they're driving, walking, biking, or taking transit.

## GOALS

- ◆ **Make getting around the County easier and safer** by understanding what leads to crashes and identifying solutions to prevent them.
- ◆ **Support significant freight and agricultural transportation needs** by helping businesses move agricultural products from farm to market, supporting local industries, and connecting residents to essential services.
- ◆ **Improve roadways for all road users by adding** shoulders for farm equipment, strengthening bridges, and building safe paths for walking and riding.
- ◆ **Ensure transportation access for all** by improving options for people with less access to transportation services, people living with disabilities, people with limited English proficiency, youth, and older folks.
- ◆ **Help local agencies better prepare for roadway closures** in response to wildfires, flooding, ice, and other unexpected events.

The County will offer opportunities to provide input on your transportation needs during development of both plans from February to November 2025.
